Installation of windows and doors international

ift seminar in English on 17 and 18 July in Rosenheim

On 17 and 18 July, the two-day seminar "Installation of windows and front doors" will take place in Rosenheim in English. The main criteria for professional planning, tendering and execution including sealing and fastening on the basis of the English "Guideline for installation" and the application are shown using practical examples. For window manufacturers, fitters and craftsmen from the window and door industry, the seminar offers interesting tips for the practical implementation of installation.

Modern window constructions offer optimum thermal, solar and sound insulation as well as high safety and usability. However, this quality can only be achieved if the installation is carried out professionally. Otherwise structural damage, reclamations and thus financial losses as well as image damage are the result – not only for the assembly company, but also for the window manufacturer. For this the companies need trained installation personnel.

The two-day basic seminar "Installation of windows and front doors" in English provides the knowledge for professional planning and execution of the fastening, sealing and insulation on the basis of the static and physical building principles, which are taught in a scientifically sound and practical manner. The basis is the English "Guideline for installation".

Info about ift Rosenheim (for the public press)

You need skills, technology and experience for good structures, and this is especially applicable to windows, facades and doors. Since 1996, ift Rosenheim has been supporting the industry as a neutral scientific institute with technical services and more than 200 employees. These include conducting tests and research, certification and quality management as well as standardisation, advanced education and technical information. In this manner, ift Rosenheim is promoting the development of quality products that are suitable for use, environment-friendly and efficient, and which make life more comfortable, more secure and safer, and healthier.
