

Package details:

**Premium package** (€4.900 plus VAT):

- One exhibit (product) at the Special Show
- One-page company profile in ift trade fair documentation folder
- Advertising by the ift (print and online)
- 50 tickets for your customers

**Basic package** (€1.500 plus VAT):

- One-page company profile in ift trade fair documentation folder
- Advertising by the ift (print and online)
- 50 tickets for your customers

We look forward to receiving your application and will be very glad to help you if you have any questions or requests.

**More than just light and shade!**

Comfort, convenience and energy efficiency through technology, functionality and quality

ift Special Show at R+T 2015  
Stuttgart, 24-28 February

## Special Show

### More than just light and shade!

Comfort, convenience and energy efficiency through technology, functionality and quality

Halle 9, Stand 9B52

Climate change has prompted huge investments world wide in energy generation and protection against natural disasters (flood prevention and protection against heat waves).

To keep buildings energy-efficient, and the people inside them comfortable, **solar shading** systems and systems for the exploitation of natural, healthy **daylight** have become vital. Together with windows and facade systems, these components need to become an integral part of the contemporary building envelope in order to reduce the amount of energy that buildings consume. The **integration** of these systems is becoming easier and more effective as window, facade and glazing systems become more advanced.

When planning their use, it is necessary to consider the following aspects: protection against solar radiation, daylight utilisation, thermal insulation, burglar resistance, UV resistance, protection against dust/sand, etc. When planning the installation of electrically powered and automatically regulated systems, the aspects of **safety in use** and **fitness for use** also need to be considered. The new product standard for these components, **EN 13659**, requires manufacturers to supply considerably more technical data than before. The ift Special Show "More than just light and shade!" will look at the key **technical parameters** for these systems. State-of-the-art products from leading manufacturers will be used to illustrate the technical, normative and statutory requirements, plus appropriate test methods and **quality assurance** procedures. The exhibits will also include industrial, commercial and garage doors and gates, products that are at the very forefront of developments in automation.

For the Special Show we are looking for innovative products from the following product areas:

1. High-performance solar shading, glare protection and daylighting systems
2. Safe, energy-efficient roller shutters in which the connections are optimised from the point of view of building physics, and which can be used to provide temporary thermal insulation
3. Window, facade and glazing systems with integrated solar shading/glare protection and daylighting systems
4. Installation and fixing systems
5. Installation and fixing systems
6. Power-operated industrial, commercial and garage doors and gates featuring innovative control and safety devices
7. Solar control glass and photovoltaic shading
8. Sustainability – products with proven sustainability credentials

**We are looking for co-exhibitors (companies and institutions) with products and ideas that will help to make our Special Show truly vibrant.**

## Co-exhibitor application form

Fax: +49 8031 261-282248

Email: [durst@ift-rosenheim.de](mailto:durst@ift-rosenheim.de)

<input checked="" type="checkbox"/>	We would like to apply to participate in the Special Show "More than just light and shade!"	
<input type="checkbox"/>	<b>Premium package</b> – aco-exhibitor exhibiting your own innovative product	€4.900 (plus VAT)
<input type="checkbox"/>	<b>Basic package</b> – company profile in trade fair documentation folder	€1.500 (plus VAT)

Please refer to the detailed package descriptions on the back of this flyer!

### Description of product:

With your application form please include a short description of your product (exhibit).
